Chakral Build

Balancing Our Chakras via Attributes, Factorization, and Primes

Alignment ("Harmonization") Chart ::

#	CHAKRA	ATTRIBUTE	COLOR	ELEMENT	MISTYS CHART
1	Root	Body	Red	Earth	eb:ec
2	Sacral	Reflexes	Orange	Water	16:17
3	Solar Plexus	Technical Ability	Yellow	Fire	e1:c1
4	Heart	Cool	Green	Air	b16:b17
5	Throat	Relic	Blue	Ether	a0:a1
6	Third Eye	-	Indigo	Light	-
7	Crown	Intelligence	Violet	Thought	eb:ec
8	Soul Star	-	White / Magenta		ff:06:b5 ???

Zen Master Meditations ::

#	ELEMENT	ATTRIBUTE	GIG NAME	MONK DONATION
1	Earth	Body	Imagine	€\$ 144
2	Water	Reflexes	Stairway To Heaven	€\$ 233
3	Fire	Technical Ability	Poem Of The Atoms	€\$ 377
4	Air	Cool	Meetings Along The Edge	€\$ 610

Theory: Misty's Chart & Zen Masters Mandala = Attributes

Some Rotation Required

Theory: Prime Numbers & Factorization Are The Key

Or At Least The First Steps

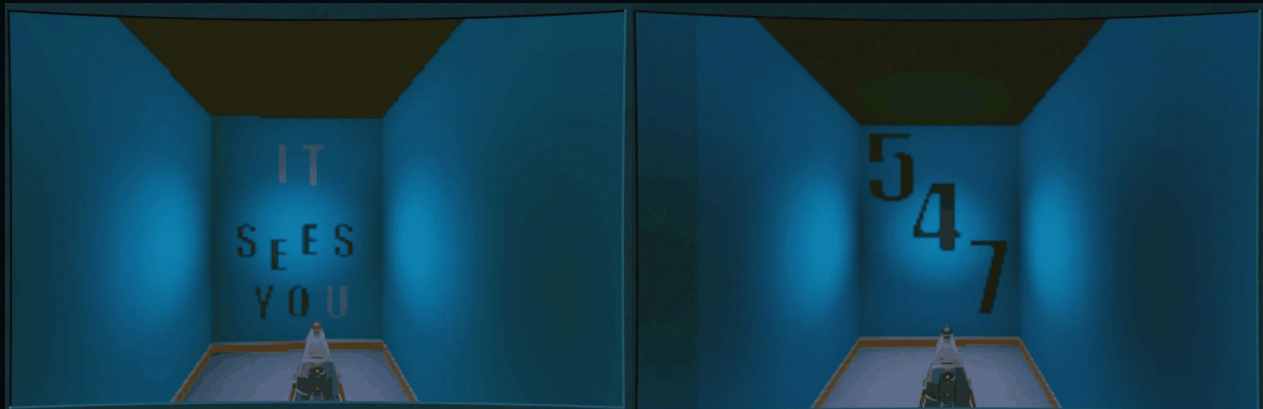

If we convert the letters in Misty's chart directly to the number associated with their position in the alphabet, we get 5 **prime numbers** [IN BOLD] to the right of the colon:

Simple Substitution Cipher Table With Primes ::

CODE	LEFT OF COLON	RIGHT OF COLON	FACTORIZATION (RIGHT OF COLON)
eb:ec	52:	:53	1, 53
16:17	16:	:17	1, 17
e1:c1	51:	:31	1, 31
b16:b17	216:	:217	1, 7, 31, 217
a0:a1	10:	:11	1, 11
eb:ec	52:	:53	1, 53

Notes:

The number **217** is the only composite number right of the colon, though interestingly, it has **31** as a prime factor, which is associated with the Attribute just prior to it (Technical Ability). A possible reason for this is that it allows for only a single 90 degree clockwise rotation of Misty's chart being the only correct orientation of the chart, as a 90 degree counter-clockwise rotation would not place the numbers adjacent to each other.

The Arasaka 3D minigame maze offers us another prime number with **547**.

The largest primes when added together that equal **547** are **193 + 354**.

Adding the four largest factors from the table above together also yields **354**.

Subtracting all of the largest factors from the table above from **547** yields **165**.

Adding all of the prime numbers in the table together also yields **165**.

"547" SAYS THAT THE CODE HAS ALWAYS BEEN ENCAPSULATED WITHIN MISTY'S CHART!

Theory: Right Of Colon Is The Way, Left Is The Answer

Time To Balance Your Chakras

So how do we obtain the correct numbers for our attributes? A possible theory is to continue with our factorization, but this time, with the numbers left of the colon!

Attributes With Factorization ::

ATTRIBUTE	LEFT OF COLON	FACTORIZATION
Body	52	1, 2, 4, 13 , 26, 52
Reflexes	16	1, 2, 4, 8, 16
Technical Ability	51	1, 3, 17 , 51
Cool	216	1, 2, 3, 4, 6, 8, 9, 12 , 18, 24, 27, 36, 54, 72, 108, 216
Relic	10	1, 2, 5, 10
Intelligence	52	1, 2, 4, 13 , 26, 52

We already know that the maximum points for any attribute is **20**. We also know that pre-DLC you could only have a maximum of **71** attribute points allotted. (Fun fact: **71** is also a prime number!)

So let's take the largest factors from each factorization that are not over **20** and add them together (excluding the Relic which has its own point system):

$$13 \text{ (BODY)} + 16 \text{ (REFLEXES)} + 17 \text{ (TECHNICAL ABILITY)} + 18 \text{ (COOL)} + 13 \text{ (INTELLIGENCE)} = 77$$

Whoops! This attribute allocation is not possible pre-DLC! So let's instead take the next lowest factor for the Cool attribute (aka the Heart chakra); it is after all the odd one out because (1) it's the only attribute without a prime number to the right of the colon like the others and (2) it is represented by six characters instead of four like the others.

$$13 \text{ (BODY)} + 16 \text{ (REFLEXES)} + 17 \text{ (TECHNICAL ABILITY)} + 12 \text{ (COOL)} + 13 \text{ (INTELLIGENCE)} = 71$$

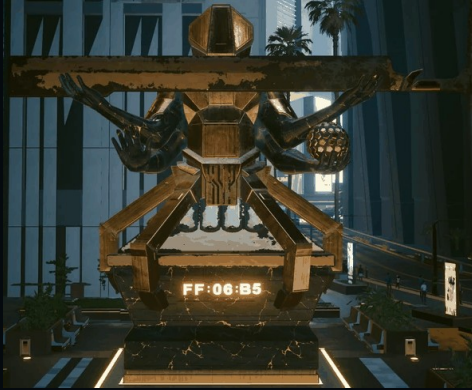

= BINGO!

The Heart chakra is also known as the bridge between the upper and lower chakras, which makes it unique among the attributes, thus making choosing **12** instead of **18** less arbitrary. It is also possible that **FF:06:B5** (the famous code on the statue) is telling us choosing **12** is exactly what we need to do...

Theory: FF:06:B5 Is A Series Of Hints Separated By Colons

Coming Full Circle

If we were to continue with the simple substitution of letters with their numerical

position in the English alphabet, we can then translate the code found on the monks statue **FF:06:B5** to **66:06:25**.

Now in keeping with our factorization theory, let's break down these values. Only this time, we're going to add a column for the sum of all of the factors:

Simple Substitution Cipher Table With Factorization ::

CODE	VALUE	FACTORIZATION	SUM OF FACTORS
FF	66	1, 2, 3, 6, 11, 22, 33, 66	144
06	06	1, 2, 3, 6	12
B5	25	1, 5, 25	31

If you've been following along, something should immediately smack you right in the forehead.

For the **FF** code, the sum of all factors becomes **144**, or the price of the Zen Master's first meditation of the Earth element in eddies (shown in the chart on page one).

For the **06** code, we get the number **12**. This is the number that we choose for the Cool attribute (Heart chakra) instead of **18**, which allows us to hit the magic number of **71** total pre-DLC attribute points when using the values on the previous page.

For the **B5** code, we get the number **31**, which is the largest prime factor of **217** (the Cool attribute once again). This is significant because **217** was the only composite number on the right side of the colons in Misty's Chart. The number **31**, as we know, was also the prime value associated with Technical Ability (Solar Plexus chakra).

IF THIS THEORY HOLDS, THIS IS THE MEANING OF FF:06:B5

Theory: The End?

Chakras, Attributes, & Values

THIS IS ALL JUST SPECULATION AND HAS NOT BEEN TESTED (WORKING ON IT)!
DON'T FORGET TO SPEND 10 RELIC POINTS AS WELL (NOT SURE IF IT MATTERS)
[BTW, RELIC IS BLUE JUST LIKE THE THROAT CHAKRA. FUNNY, HUH?]

GOOD LUCK CHOOMS!
